30W DC/DC Regulated Adaptor for DVD, Camera and Handheld Video Games

In the era of battery and charger dependence for our many devices, much effort is going into ways to improve display efficiency or battery energy density. But some users are taking an even more novel approach and finding ways to **mobile power** to recharge-or even run - their electronics devices.

PLUG and USE – The smallest and lightest automatic mobile power adaptor is ideal for all electronic items drawing up to 3 amperes from your car. It is fully regulated to assure that a constant accurate DC power is delivered to different kinds of electronics and electronics appliance. Enjoy unlimited use of most electronic items from your car. It is designed for use with Most Portable DVD Players requiring DC 9/10/12V

PRODUCT DESCRIPTIONS

SPECIFICATION:

Input Voltage: 10. 5-16Vdc typical.

Output: 9/10V DC 3A Max, 12V DC 2A Max

Power Wattage: 30 Watt

PROTECTION:

Over voltage, short circuit, over current and input over / under-voltage
